

SARAS EQUIPMENTS PRIVATE LIMITED

SAFE LOAD INDICATOR & RELATED SOLUTIONS

For Worldwide Crane & Lifting Applications

A yellow construction crane is the central focus, positioned on a dirt field. The crane's boom extends upwards towards the top of the frame. The background shows a hazy, overcast sky and some distant structures. The overall image has a slightly blurred, soft-focus quality.

Saras Equipments Private Limited is a leading manufacturing company known for delivering high-quality, innovative products across the construction and manufacturing industries. Our diverse product portfolio includes Automatic safe load indicator, load moment indicators and many other safety products . Our electronics division offers smart, safe and energy-efficient appliances. Our tools and hardware are built for durability and performance, catering to professionals. Sustainability, quality control, and customer satisfaction are the core pillars of our manufacturing process. We continually invest in R&D to meet evolving market demands. With a global presence, we are committed to excellence in every product we deliver.

CATALOGUE

Land-based Lifting Equipment Solution

- Crawler Crane
- Mobile Crane
- Tower Crane
- Pipelayer Crane
- Portal crane
- Ship crane

Port & Shipyard Lifting Equipment Solutions

Load Moment Indicators

- Pilling rig machine
- Luffing boom
- Boom lift
- Passenger lift
- Wire Rope Suspended Platform
- EOT/Gantry crane
- Anchor Winch Loading System

Accessories Series

- A2B Limit Switch
- Tension Meters
- Load Cells
- Buzzers
- Rear View Camera
- Biometric Access Device
- Aviation Light
- Crane Anemometer
- Anti Collision Device
- LED Boards

An Anti-Collision Device (ACD) is a vital safety system used in tower cranes to prevent accidents on construction sites. It continuously monitors the position and movement of cranes and provides real-time alerts to operators in case of potential collisions with nearby cranes or structures.

ANTI COLLISION DEVICE

A Human Sensor is an electronic device designed to detect the presence or movement of people in a specific area. These sensors are widely used in automation, safety, and energy-saving applications.
